Our Company

Our Company

- Created in 2001, after the Colombian 1990's mortgage crisis.
- First asset securitization company in Colombia.
- Equity: More than USD \$43.65* million (February).
- Supervised by the Financial Superintendence of Colombia.
- More than USD **\$7.40* bn** in **86** issuances.

Our Purpose

Connecting the financing needs of different economic activities with the capital market, with transparency, efficiency and under the principles of sustainability, through the securitization of assets.

Titularizadora Colombiana
Administración Maestra de emisiones de
Titularización de Cartera hipotecaria
CO - S.C - CER145151

Signatory of:

- Our shareholders are **national financial institutions** with extensive experience and recognition in the local and regional market.
- They mainly include **banks and insurance companies**.
- Their experience and reputation in the financial sector allow them to contribute significantly to the development and growth of **Titularizadora Colombiana**.

We group or package financial assets to be transformed into securities and sold to investors in the market.

- Others

Warranties

- Internal
- External
- Credit Enhancement

Leader in the securitization market, with 24 years of experience, 86 issuances, and over \$7.40* billion issued.

Turnkey process: No intermediaries required. All activities are carried out by Titularizadora Colombiana.

Originator's cost coverage: The originator does not incur initial, fixed, variable, or commission expenses. These costs are borne by the SPV.

The SPV is not subject to tax liability (no income tax, VAT exemption, and Financial Transactions Tax).

Automatic registration and approval of mortgage issuances with the SFC (approval within 3 to 5 days).

Consolidated relationship with institutional investors interested in this asset class.

Expert, specialized, and highly qualified team.

We share best market practices in portfolio origination and management.

Originators

- Securitization is an alternative for **funding diversification** and a tool to **manage balance sheet risks**.
- By selling the assets, the originator obtains **liquidity / financing**.
- Selling assets to the trust allows for the **transfer of credit, liquidity, interest rate, and prepayment risks** associated with that collateral to the investors in the securities, who have greater capacity and agility to manage them.
- By transferring portfolio risks and selling the assets, provisions are recovered, and capital is released.
- **It reduces mismatch risks.**
- Securitization enables financing through the **capital markets**.

Investors

- Diversification of **investment alternatives**.
- Possibility to invest in assets through solid structures **without assuming the direct risk of the asset**.
- **Competitive returns compared to other investment alternatives.**
- Possibility to invest in assets with **different levels of risk**.

Structuring

- Standard certification and formulation.
- Definition of selection criteria.
- Financial structure
- Operational structure
- Legal structure
- Portfolio acquisition.

Placement

- Commercial Management.
- Investor Visits.
- Coupon Rate Definition.
- Allocation.

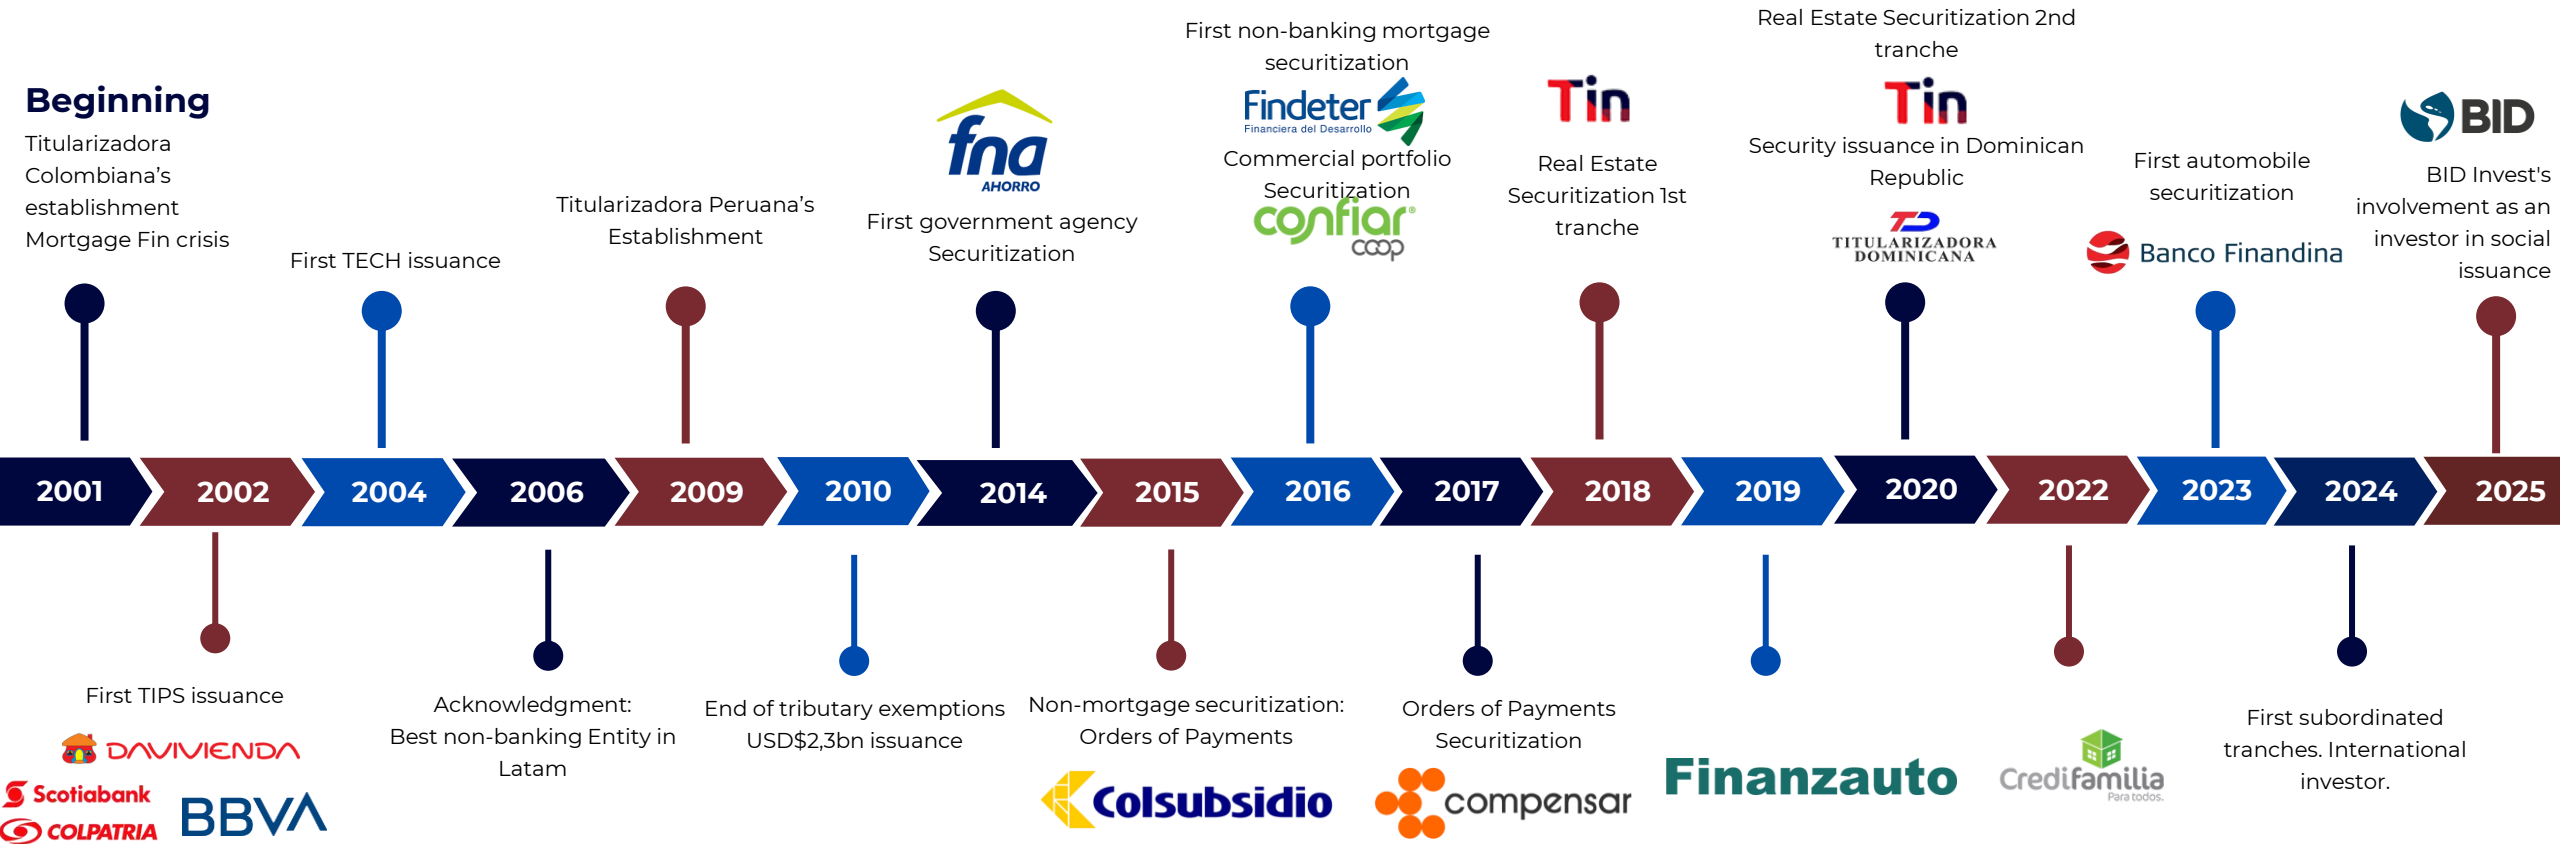

Management

- Asset Management
- Liability Management
- Investor Relations
- Market Issuance Reports
- Development of the Securities Market - Secondary Market

Securities**

Originator

Purchase of Eligible Loans by TC

Universality

Key Elements of the Financial Structure

True Sale: The loans are removed from the originator's balance sheet.

Originators usually subscribe to subordinated and residual securities.

Tranches A + B **are backed** by the principal of the loan pool.

Coverage Mechanisms

- **Subordination**
- **Partial Credit Enhancement Mechanism**
- **Excess Spread**
- **Balance Adjustment**
- **Payment Suspension Clauses**
- **Interest Rate Reduction Mechanism**

* Flexibility to structure TIPS A with different tranches, maturities (from 5 to 15 years), and durations (from 1 to 5 years), according to investor preferences and the characteristics of the loan portfolio to be securitized.

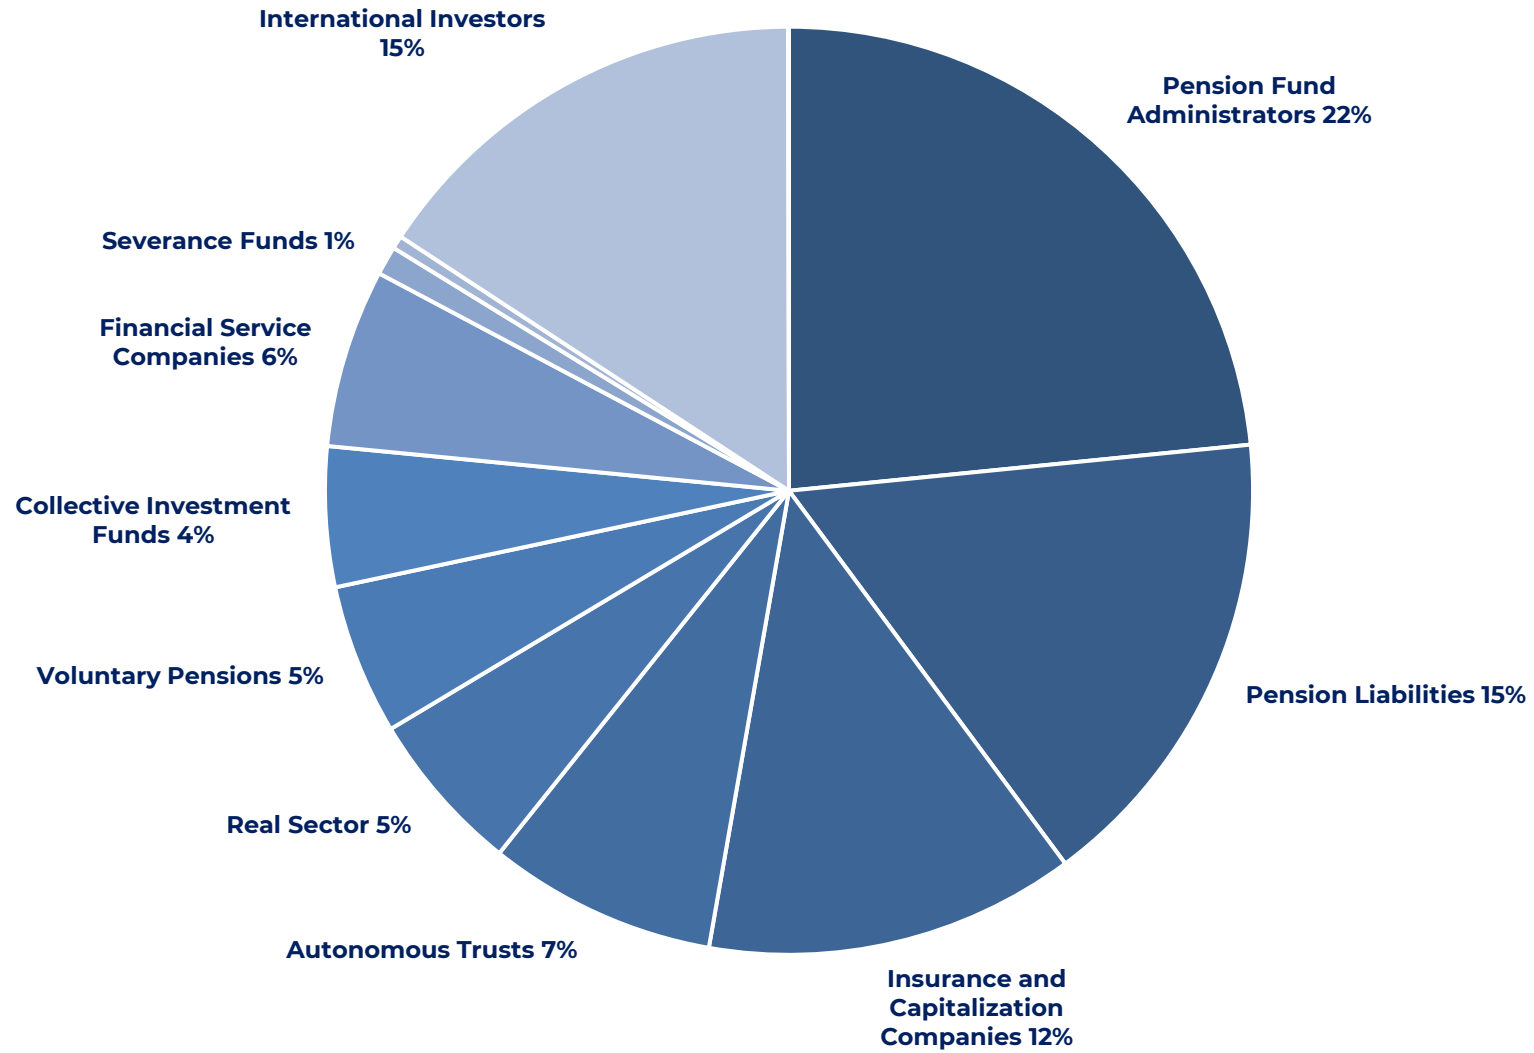

Master Servicing processes contribute to the evaluation of originators and servicers, the standardization of origination and servicing processes, and the reduction of operational and credit risk in the issuances.
