TITULARIZADORA COLOMBIANA S.A., IN ITS CAPACITY AS MASTER SERVICER OF THE TIN SECURITIZATION TRUST,

ANNOUNCES THE SUCCESSFUL COMPLETION OF THE TIN SECURITIES BUYBACK PROGRAM

Titularizadora Colombiana S.A., in its capacity as Master Servicer of the TIN Securitization Trust, informs the market that the TIN Participation Securities Buyback Program was successfully completed on October 28, 2026. The Program commenced on April 21, 2026 and concluded when the available resources of the Buyback Fund were exhausted, in accordance with the Buyback Program Regulations.

The Program and its Regulations were approved by the Advisory Committee of the TIN Securitization Trust on February 25, 2026 for a maximum amount of COP $5.550 billion. During the Program, 410,636 TIN Participation Securities were repurchased for a total amount of COP $5,549,994,260 million, at a weighted average price of COP $13,516 per security. This represents 2.11% of the securities outstanding before the Program commenced. As a result, the number of TIN Securities outstanding decreased from 19,463,850 to 19,053,214.

The Program was executed by Larrain Vial Colombia S.A. Comisionista de Bolsa, acting as Buyback Agent, through the BVC trading mechanism. The price of each transaction resulted exclusively from price formation on the BVC, ensuring transparent execution aligned with market conditions.

The results of the Program reaffirm the strength of the TIN Securitization Trust and confidence in the vehicle performance and potential for appreciation and liquidity. The reduction in the number of securities outstanding strengthens investor returns by increasing the dividend yield per security. Together with other factors that have supported positive market performance, this is reflected in a price that has appreciated by 21% since the Program began. In addition, the recurring demand generated during the Program contributed to a more active secondary market and improved price formation.

Titularizadora Colombiana will continue advancing the strategy to develop the TIN Securities market, which began with the migration to the equity trading system and has been supported by the currently active Liquidity Provider Program, with the aim of continuing to generate value for investors.
